

Technical Consultant / Developer JAVA/JEE - Junior

Our Company

Apgar Consulting is a Consulting company dedicated to the definition and the implementation of strategies aiming to improve the use and sharing of key information toward Business operations.

Apgar Consulting puts together its Expertise in Company Architecture and collaborative solutions implementation to carry its Clients from the early stages of their reflection until the international spreading of the implemented solutions.

Since 2006, Its partners have been dedicated to Master Data Management and Data Exchange in various contexts and upon the Top Market solutions. They support the projects and bring an insight at every step: scoping, organization, design, implementation and integration.

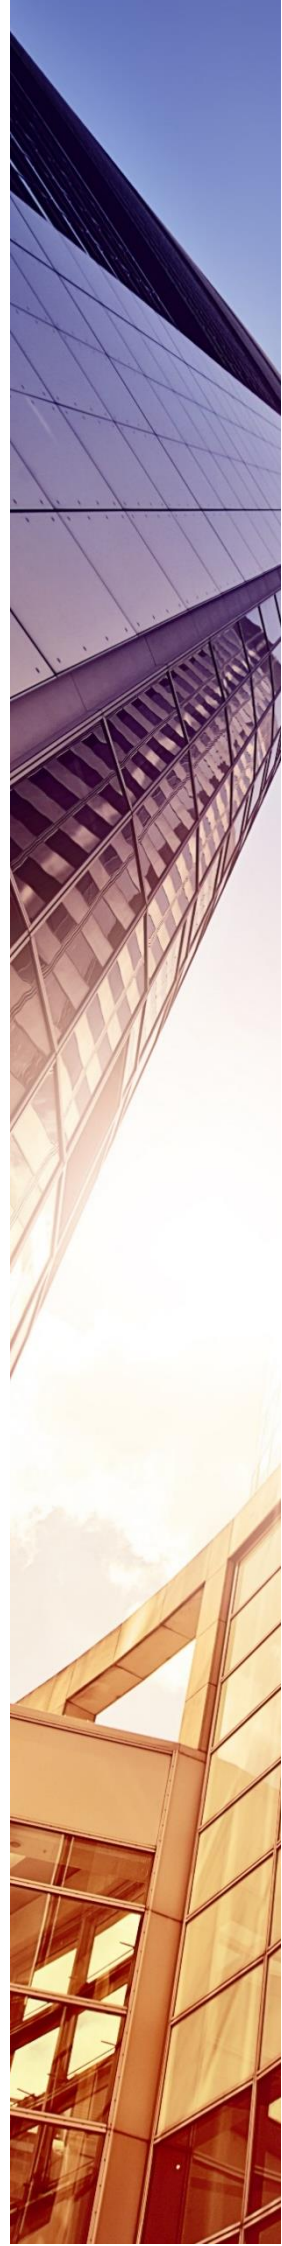

As such, it supports its partners all along their Data Initiatives based on 4 pillars

- **Information strategy:** Apgar Consulting proposes a range of services to study, scope, and master initiatives to reshape or to innovate in IT system.
- **Master Data Management:** Apgar Consulting covers the full scope of your MDM project from the feasibility study to the support of “business as usual” activities, going through all implementation phases.
- **Data Exchange:** Apgar Consulting supports your initiative for data exchange : from the definition of the functional and software architecture to the development of technical, methodological and organizational framework for the implementation and monitoring of your data exchanges.
- **Big Data governance / Metadata management:** Apgar supports its clients throughout their Big Data initiatives, by defining architectures, integration and maintenance projects around 5 axes that are : Big Analytics, Time to Market, Information Governance, Go to Market and Agility.

Apgar Consulting strongly believes in the Core Values that make it unique:

- The whole team commitment to provide high quality services
- The sincere belief that a sustainable partnership between Client and integrator is a key to success
- The certainty in Innovation being essential to enhance the know-how
- The will to be Responsible:
 - Optimal working conditions for our employees
 - A positive impact through our activities on the environment

Apgar Consulting works with SMEs as well as with Key accounts in France, Europe and Middle East. The consultants work mostly within project-teams at the client’s location or at the office.

Your Mission

As a junior technical consultant, you will work within a team on a project conducted with a customer.

You will benefit from the supervision of a manager or a senior consultant.

Your mission goals will be:

- To participate to all technical stages of a solution implementation project based on Orchestra Networks EBX5 technology, or of a Data Exchange solution implementation project based on various leading technologies:
 - Architecture definition
 - Solution setup and operational rules definition
 - Work hand in hand with the business teams
 - Solution settings and Java specific development
 - Solution validation
 - Customer service for setup and administration
- To work with vendor's R&D and Support team
- To participate to Apgar's internal Innovation process
- Under the technical manager supervising, design and develop software layers additional to complete the functionalities of the implemented tools
- Discover and operate new technologies in order to widen Apgar's services

The profile we are looking for:

You have a higher education (Bachelor or Master degree).

You want to commit yourself into missions that require curiosity, capacity for adaptation, self-reliance and good communication skills.

You have good skills in software development in Java/J2EE environment (programming, operating systems UNIX/ Linux, database usage).

You know UML modeling, XML objects manipulation and you are familiar with the following software: Eclipse, Tomcat, Maven, Oracle, Subversion, Microsoft Team Foundation Server or GIT.

Competency in Web technologies and SOA are a plus: HTML/CSS, JavaScript, Ajax, Web services (CXF), JMS, ESB solution.

Dynamic and enthusiast, you feel comfortable with teamwork and you aim to take part to our company's growth and our young consultant training.
