

# React Native Developer Job Description

We are looking for a React Native developer interested in building performant mobile apps on both the iOS and Android platforms.

You will be responsible for building native web applications with a focus on front-end development. The ideal candidate is an advanced React Native Developer who can build dynamic, high performing, and responsive UI for our web applications.

## Responsibilities

- *Collaborate with a team of developers and designers to create a web application run on multiple platforms such as android or iOS.*
- *Architect, build and maintain excellent React Native applications with clean code, while creating reusable, effective, and scalable JavaScript code.*
- *Test and update web application so that it can be used on all web browsers.*
- *Design the data and presentation layer of the web application's front-end.*
- *Use additional JavaScript libraries such as Redux to manage the web application's state, derive computed data from the state of the system, and make asynchronous API calls.*
- *Translate the client's technical requirements into code.*
- *Leverage native APIs for deep integrations with both platforms.*
- *Diagnose and fix bugs and performance bottlenecks for performance that feels native.*

## Requirements

- *Bachelor's degree in Computer Engineering, Computer Science, or related field required. –*
- *Proficiency in English*
- *Availability to join at the earliest*
- *A Minimum of 2+ years of professional experience working with React Native.*

- *2+ years of professional software development experience.*
- *An understanding of React Native best practices and a commitment to following them.*
- *Ability to create and maintain continuous integration and delivery of React Native applications.*
- *Experience working with Swift, Objective C, and Java a plus but not required.*
- *Firm grasp of the JavaScript language and its nuances, including ES6+ syntax*
- *Good experience in JavaScript, modern JavaScript, HTML programming languages*
- *Ability to write well-documented, clean Javascript code*
- *Highly proficient in one or more libraries (e.g. Redux, React Router, etc) for state managing and routing in addition to React.*
- *Proficient in using Git as a control system*
- *Rock solid at working with third-party dependencies and debugging dependency conflicts*
- *Familiarity with native build tools, like XCode, Gradle*
- *Understanding of REST APIs, the document request model, and offline storage*
- *Meaningful experience working on large, complex systems.*
- *A positive mindset and can-do attitude.*
- *Attention to details.*
